

DILLORA BY KASHVIN

Admin Dashboard Guide

How to run your online store, section by section

For the store owner

Getting started

Everything about your shop is managed from your private **Admin Dashboard**. No coding needed.

Store (customers)	dillora-kashvin.vercel.app
Admin dashboard	dillora-kashvin-admin-dashboard.vercel.app

Log in with your email and password. Use the menu on the left to move between sections. On a phone, tap the menu button at the top-left to open it.

Overview

Your home screen — a quick snapshot of the business:

- Revenue, number of orders, product count and average order value.
- A 7-day sales chart, recent orders and your top products.
- Low-stock items to reorder.

Orders (your daily job)

- See every order. Open one to view the customer, items, address and payment.
- Update the **status** as it moves: Processing -> Shipped -> Delivered.
- For Cash-on-Delivery or advance orders, tap **Mark balance collected** once you receive the money.
- Approve or reject **cancellation requests** (cover orders, within 48 hours). Approving restores stock automatically.
- Download or email the **invoice** for any order.

Products & stock

- **Products** - add or edit items: name, price, category, description, photos and stock.
- **Lock** a product to stop its stock being changed by mistake.
- **Variants** - add the colours an item (t-shirt / crochet) comes in. Customers pick the colour from a drop-down.
- **Pair It With** - suggest related items shown as 'You may also like' / charms with covers.
- **Phone Brands & Models** - manage the brand/model list for covers; add a brand logo; bulk-import many models at once.
- **Policies** - the shipping / return / quality text shown on each product page.

Promotions & marketing

Run all your marketing yourself:

Coupons	Discount codes (e.g. WELCOME10) with a value and expiry.
Offers	Automatic deals like Buy-2-Get-1, applied at checkout with no code.
Promo Banners	The big colourful banner on the home page (title, offer, button, countdown).
Popups	Welcome popup, How-to-Order steps, and a Promotion popup.
Countdown bar	The 'Sale ends in...' strip at the top of the store (under Settings).
Homepage Hero	The large banner image + headline at the top of the store (under Settings).

Keep a coupon and its popup consistent: if a popup says 'Use code DILLORA10', make sure that coupon actually exists under Coupons (it does - 10% off orders above Rs.999).

Reviews & feedback

- **Reviews** - approve, hide or reply to product reviews.
- **Feedback** - the 'How was your experience?' popup after delivery; approve it to show as a testimonial.
- **Review reward** - automatically gives a discount coupon to customers who review (toggle in Settings).

Settings

The details customers read and the contact points:

- Estimated delivery days, return / quality / packaging policies.
- Your **WhatsApp number** (currently 9004779954) - powers the floating chat button, order-confirm link and 'Customise on WhatsApp'.
- Instagram link, GST details for invoices, and the homepage hero.

How customers pay you

Pay online	Full payment now via UPI / cards / net-banking / wallets. Money settles to your bank.
Half online + COD	50% now to reserve a customised item, rest on delivery.
Cash on Delivery	Full amount in cash on delivery - offered only for mobile-cover orders.

Invoices are created automatically for every order under **Invoices**.

Your everyday checklist

- Fulfil new orders and update their status.

- Collect COD / balance payments and mark them.
- Restock low items.
- Approve new reviews and feedback.
- Refresh a promotion now and then to keep the store lively.
- Reply to WhatsApp enquiries.

Tip: after you change something in the admin, open the live store and refresh to see it. Most changes appear instantly.
